People say that you never stop learning, that there is something new to learn every day. Well below are some facts that you might not have known!

In 1876, Alexander Graham Bell made the first phone call and in 1877 created a company called The Bell Telephone Company, which is now known as AT&T!

Lucy Hobbs got her degree in 1866 from the Ohio College of Dental Surgery and was not only the first female dentist, but a women's right advocate!

King Charles II of England granted a huge tract of land in the New World to William Penn to settle an outstanding debt. The area later became Pennsylvania.

The history of Monopoly can be traced back to 1903, when American anti-monopolist Lizzie Magie created a game, which she hoped would explain the single-tax theory of Henry George. It was intended as an educational tool, to illustrate the negative aspects of concentrating land-in private monopolies.
